This report forms part of the EU co-funded project “Improving Prison Conditions by Strengthening Infectious Disease Monitoring” implemented under the lead of Harm Reduction International in 2015 and 2016.

This project is co-funded by the European Union under the Criminal Justice Programme. The contents of this publication are the sole responsibility of the authors and can in no way be taken to reflect the views of the European Commission.

## Acknowledgements

---

A debt of gratitude is first and foremost owed to Cinzia Brentari, who expertly managed this project and provided unwavering support and helpful feedback throughout the development of the tool.

This tool was developed with the indispensable guidance and support of an Expert Committee. The members of the Expert Committee, to whom a sincere thank you is owed, were: Andrea Huber, Francesca Gordon, Hans Wolff, Heino Stover, Lars Møller, Laurent Michel, Mari Amos, Rick Lines, and Stefano Anastasia.

This tool is part of a broader project which Harm Reduction International is undertaking with the help of the following national organisations: Antigone Onlus Associazione (Italy), Praksis Association (Greece), Latvian Centre for Human Rights (Latvia), Helsinki Foundation for Human Rights (Poland), University Institute of Lisbon (ISCTE-IUL) (Portugal), Observatorio del Sistema Penal y Los Derechos Humanos de la Universidad de Barcelona (Spain) and Irish Penal Reform Trust (Ireland). We would like to thank these organisations for their valuable national-level research, which provided justification for, and helped to inform, the monitoring tool. A special thank you must be extended to Alessio Scandurra (Antigone Onlus Associazione), as well as Nuno Pontes and António Pedro Dores (University Institute of Lisbon (ISCTE-IUL)), for providing helpful feedback on earlier versions of the tool.

We would also like to thank our colleagues at Harm Reduction International, and in particular Catherine Cook, Maria Phelan, and Rick Lines.

Finally, we are very grateful to Damon Barrett, Ehab Salah, Kate Dolan, Paul Hunt, and Philip Davis who all took time out of their busy schedules to review the tool and provide their valuable feedback.

## Glossary

<b>Active and informed participation:</b>	Participation in the formulation, implementation, monitoring and evaluation of all decisions, policies and interventions that affect one's health to ensure respect for human rights. Also ensuring that health systems and interventions are responsive, effective, appropriate and sustainable. Participation is 'informed' when one is able to access the information required to participate in a meaningful and effective way. If necessary, capacity-building activities should be carried out to ensure this is possible.
<b>Disaggregated data:</b>	Data that is broken down into smaller, specific sub-groups with the same identifiable criteria, such as sex, gender, sexual orientation, race, health status, social class, etc. It is essential in identifying inequalities, possible human rights violations, and in measuring the effectiveness of health related policies and interventions.
<b>Gender-responsive:</b>	Health care, treatment and services that are gender-responsive are respectful, and informed by knowledge and understanding, of the particular lived experiences, inequalities, preferences, concerns and needs of individuals based on their distinct genders (or sexes/sex characteristics), gender identities and forms of gender expression. They also take into consideration the interrelationship between gender and a range of other factors (social, economic, etc.) that impact on a person's wellbeing.
<b>Harm reduction:</b>	Policies, programmes and practices that aim to reduce the harms associated with the use of psychoactive drugs among people who choose to actively use. For more information, visit: <a href="http://www.ihra.net/what-is-harm-reduction">http://www.ihra.net/what-is-harm-reduction</a>
<b>Needle and syringe programme (NSP):</b>	These programmes supply sterile needles/syringes and related injecting equipment to people who are actively injecting for safer drug use.
<b>Opioid substitution therapy (OST):</b>	Prescribed medication, supplied to people who use drugs, as a replacement therapy for opioid dependence. OST decreases or eliminates injecting practice among people who use drugs, thus significantly reducing HIV and hepatitis C transmission in this group, an outcome for which there is a well-established evidence base.
<b>Prison:</b>	The term "prison" is used throughout this tool to refer to all detention facilities. Although the tool does not explicitly focus on issues particular to juveniles/youth detention centres, or migrants/migrant detention centres, it still applies to them.
<b>Prisoner:</b>	The terms "prisoner" and "detainee" are used interchangeably throughout this tool to refer to adults deprived of their liberty.
<b>Prohibited grounds of discrimination:</b>	International human rights law prohibits discrimination on the grounds of: race, colour, sex, gender, language, religion, political and other opinion, health status, legal status, national or social origin, or any other status.

# Introduction

HIV, hepatitis C virus (HCV) and tuberculosis (TB) are major health concerns in prisons,<sup>1</sup> with substantially higher prevalence levels among incarcerated populations than in the general population outside of prisons. Global HIV prevalence, for example, can be up to fifty times higher among the prison population than in the general public.<sup>2</sup> One in four detainees worldwide is living with HCV,<sup>3</sup> in comparison to, for example, one in fifty in the broader European community.<sup>4</sup> The prevalence of TB in prisons is up to 81 times higher than in the general population.<sup>5</sup>

Prisons and other places of detention are high-risk environments for the transmission of these diseases for a number of reasons, including the over incarceration of vulnerable and disadvantaged groups who carry a disproportionately high burden of disease and ill-health; the criminalisation of drug users and risky injecting practices within prisons; overcrowded and substandard prison conditions; inadequate health care; and the denial of harm reduction services. Considering that all people deprived of their liberty come into contact with prison staff and visitors on a daily basis, and eventually return to their communities, prison health has important implications for wider public health.<sup>6</sup>

But HIV, HCV and TB in prisons are more than just a public health concern. They are also a serious human rights issue. People deprived of their liberty retain all of their fundamental rights and freedoms, apart from those rights that are necessarily limited as a result of being detained.<sup>7</sup> The prevention, treatment and care of HIV, HCV and TB in places of detention engage many human rights protections, including the right to the highest attainable standard of physical and mental health (right to health) and the right to be free from cruel, inhuman or degrading treatment (also known as ill treatment). Treatment is generally considered to be cruel, inhuman or degrading when it causes serious but unintentional mental or physical suffering or injury, or violates the dignity of a person.<sup>8</sup> United Nations human rights mechanisms and the European Court of Human Rights are increasingly finding that issues relating to HIV, HCV, TB and harm reduction in detention can contribute to, or even constitute, conditions that meet the threshold of ill treatment. This can include the inadequate prevention, care or treatment of HIV, HCV and TB,<sup>9</sup> the denial of harm reduction services,<sup>10</sup> or conditions that aggravate or favour the transmission of these diseases.<sup>11</sup> For these reasons, it is critically important for human rights-based monitoring mechanisms that have a mandate to prevent ill treatment – including National Preventive Mechanisms (NPMs), the European Committee for the Prevention of Torture and Inhuman and Degrading Treatment or Punishment (CPT) and the United Nations Subcommittee on the Prevention of Torture (SPT) – to systematically examine issues relating to HIV, HCV, TB and harm reduction in places of detention.<sup>12</sup>

This tool has been developed by Harm Reduction International, in consultation with an Expert Committee, to assist human rights-based monitoring bodies in fulfilling their preventive mandate in the context of HIV, HCV, TB and harm reduction in prisons.

- 1 The term "prison" is used throughout this tool to refer to all detention facilities. Although the tool does not explicitly focus on issues particular to juveniles/youth detention centres, or migrants/migrant detention centres, it certainly still applies to them.

## About this tool

---

This monitoring tool is made up of indicators, presented as straightforward questions, which all derive from widely accepted public health and human rights standards.<sup>13</sup> Taken as a whole, including appendices, the tool is meant to be comprehensive and therefore essentially examines the main elements of a human rights-based approach to HIV, HCV, TB and harm reduction in prisons. It also identifies the main elements of a strong and equitable health system that is conducive to prisoners realising their human rights, especially in the context of HIV, HCV and TB.

While the content of the tool may appear largely health-related, no medical background or expertise is required for its use. Firmly rooted in human rights, the tool has several objectives that are inextricably linked. The first is to identify often overlooked situations and conditions relating to HIV, HCV, TB and harm reduction that can lead to ill treatment, therefore helping to prevent human rights violations before they occur. The second is to monitor and identify progress and obstacles in the implementation of prisoners' human rights, and particularly their health-related rights. Consistent use of the tool should help human rights-based monitoring bodies fulfil their preventive mandates while leading prisoners to experience improvements in their health, treatment, and conditions of detention, as well as enhanced enjoyment of their human rights.

## Using the tool

---

### WHO?

The tool is intended, first and foremost, for human rights-based prison monitoring bodies whose mandates include the prevention of ill treatment. It can, however, also be used by monitors that are not necessarily working within a human rights framework. This includes Health Care Inspectorates, non-governmental organisations and prison boards. It could also serve as an instrument of self-assessment for states and prison authorities.

### WHERE?

The tool was devised with adult prisoners in mind, but it can be applied to any place of detention and in relation to any category of detainee. For example, while children and youth do not factor in the current tool, many questions apply to them and several could be appropriately revised or added if undertaking a monitoring visit to a youth detention centre.

### HOW?

The main focus of this tool is on issues identified as the most pressing and currently overlooked with regards to the prevention of ill treatment in the context of HIV, HCV, TB and harm reduction in prisons. This is its unique contribution to the monitoring process, and the questions identified in the main checklist are those that should urgently be integrated into the working practice of human right-based prison monitoring mechanisms. Three complementary questionnaires are included as appendices and cover issues related to HIV, HCV, TB and harm reduction with regards to national context (Appendix A), the prison health system (Appendix B) and accountability for prisoners' health and human rights (Appendix C). These were developed alongside, and to complement, the central questionnaire. Importantly, all four questionnaires are interrelated and, when taken together, comprise the main elements of a human rights-based approach to harm reduction in prisons. If time and resources permit, they would ideally be applied together. However, this type of periodical targeted or thematic visit might not be possible, or some of the sections or questions identified may already be covered by one monitoring process or another. If sections must be prioritised for whatever reason, again, it is recommended that the main questionnaire on HIV, HCV, TB and harm reduction be given precedence.

Guidance is provided in each subsection in terms of whom the questions should be directed to. This is flexible and will often depend on the context. Most questions require a 'yes' or 'no' answer. If the answer is unknown, not applicable, or more complicated than a simple 'yes' or 'no' answer, an explanation can be included in the comment space provided. Sometimes, independent research will be required prior to the visit, and in some cases following the visit, to fill in any unresolved questions. Some questions will need to be answered based on independent inspection and observation of, for example, the establishment's facilities and conditions while on site. Other questions will require that something be rated on a scale of 1 to 10. In those cases, 1 will always be the lowest/poorest rating, while 10 will be highest/strongest rating. Some of the answers to these questions will be subjective – either on your part or the interviewee's part. From a human rights perspective, it is important to include qualitative indicators, which capture people's judgements and perceptions, as these not only help to place complicated issues into context, but also promote meaningful participation and empowerment.

---

## WHAT NEXT?

After each prison inspection, the data obtained through the monitoring tool will require some interpretation and analysis, and general findings and recommendations should be highlighted in a written report. The report should not be limited to identifying standards that are not being met, but should also try to explain, at least in part, the reasons why this might be happening, alongside recommendations as to how these situations might be prevented or remedied. If appropriate, it will also be useful to highlight any emerging themes, as well as situations that could potentially lead to ill treatment or other human rights violations, including of the right to health. In line with the updated Standard Minimum Rules for the Treatment of Prisoners, it is recommended that a copy of the report be submitted to the appropriate government and prison authorities, and that due consideration be given to making the reports publicly available, excluding any identifying information on prisoners unless their explicit consent is given.<sup>14</sup> It is also recommended that, if appropriate, a copy of the completed questionnaire(s) be made publicly available - again, excluding any identifying information on prisoners unless their explicit consent is given - to enable comparative analysis and broader conclusions to be drawn. Finally, monitoring bodies should consider asking prison administrations or other competent authorities to indicate, within a reasonable amount of time, whether they will implement the recommendations resulting from the visit.<sup>15</sup> Follow-up(s) with the relevant authorities may be required to ensure that steps are being taken to implement the recommendations and to assess the amount of progress that is being made.

---

<sup>14</sup> United Nations Standard Minimum Rules for the Treatment of Prisoners (the Mandela Rules) (21 May 2015) UN Doc No E/CN.15/2015/L.6/Rev.1, 21, Rule 85 (1).

<sup>15</sup> *Ibid.* Rule 85(2).

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

The issues covered in this questionnaire are extremely important for prison monitors to examine. As already explained, HIV, HCV and TB are much more serious problems in prisons than in the broader community. Prevalence rates are significantly higher and transmission is much more likely for a number of reasons, including unsafe injecting drug use and inadequate health care. Despite unequivocal evidence demonstrating that the most effective way to prevent HIV and HCV infection within prisons is through the provision of harm reduction services such as needle and syringe programmes (NSPs) and opioid substitution therapy (OST),<sup>16</sup> these services are extremely limited in prisons in comparison to what is available in the community. These issues very clearly raise serious human rights concerns, including with regards to the right to be free from ill treatment, which imposes obligations on authorities to protect not only the lives, but also the health and well-being of prisoners, as demonstrated by a growing number of regional and international statements and judgements.<sup>17</sup> This section draws attention to issues that are not currently being monitored in a systematic or comprehensive way, and are meant to help identify often overlooked conditions, situations and practices that might lead to ill treatment in the context of HIV, HCV, TB and harm reduction in prisons.

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

1. PRISONER HEALTH STATUS		Details / Comments
<i>(to be asked to prison authorities, health care staff and prisoners as appropriate)</i>		
1.1	How many prisoners are currently known to be living with HIV?	
1.2	How many voluntary HIV tests were carried out in the last 12 months?	
1.3	How many prisoners tested positive for HIV in prison in last 12 months?	
1.4	What was the HIV/AIDS mortality rate in the last 12 months?	
1.5	Is any data on HIV in the prison disaggregated? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.6	If so, please include this data here:	
1.7	How many prisoners are currently known to be living with HCV?	
1.8	How many voluntary HCV tests were carried out in the last 12 months?	
1.9	How many prisoners tested positive for HCV in prison in the last 12 months?	
1.10	What was the HCV mortality rate in the last 12 months?	
1.11	Is any data on HCV in the prison disaggregated? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.12	If so, please include this data here:	
1.13	How many prisoners are currently living with TB?	
1.14	How many TB tests were carried out in the last 12 months?	
1.15	How many prisoners contracted TB in prison in the last 12 months?	
1.16	What was the TB mortality rate in prison in the last 12 months?	
1.17	Out of these, how many were co-infected with HIV/AIDS?	
1.18	Is any data on TB in the prison disaggregated? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.19	If so, please include this data here:	
1.20	How many prisoners currently identify as being dependent on illicit drugs?	
1.21	Is injecting drug use known to be occurring within the prison? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.22	Has the sharing of injecting equipment among prisoners been reported, observed or documented? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.23	How many drug overdoses were reported in the last 12 months?	
1.24	How many fatal drug overdoses were reported in the last 12 months?	
1.25	Is data on overdoses disaggregated at all? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.26	If so, please include this data here:	

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

2. PREVENTIVE/HARM REDUCTION SERVICES			Details / Comments
<i>(to be asked to prisoners, prison staff and health care staff, as appropriate)</i>			
2.1	Do prisoners have access to sterile injecting equipment during their incarceration, i.e. through a needle and syringe programme?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.2	If so, is sterile injecting equipment:		
2.3	Available at relevant times (i.e. in the evening, when prison drug use is more likely to occur)?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.4	Available in more than one location?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.5	Available to all prisoners, i.e. on a non-discriminatory basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.6	Accessible on a confidential basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.7	Free of charge?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.8	Accompanied by information/education on safer injecting practices?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.9	Accompanied by information/education on safe disposal?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.10	Accompanied by advice on how to avoid an overdose?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.11	Provided in a gender-responsive manner? <sup>18</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.12	By whom or how is sterile injecting equipment administered? <u>Please select answer(s):</u> <input type="checkbox"/> Trained prison staff <input type="checkbox"/> Untrained prison staff <input type="checkbox"/> Trained health care staff <input type="checkbox"/> Untrained health care staff <input type="checkbox"/> Automated dispensers <input type="checkbox"/> Peers <input type="checkbox"/> From outside agencies Others:		
2.13	Are condoms and lubricants available to prisoners?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.14	If so, are condoms and lubricants:		
2.15	Easily and discreetly accessible to prisoners?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.16	Accessible on an anonymous basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.17	Accessible to all prisoners, i.e. on a non-discriminatory basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.18	Free of charge?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.19	Available in various locations?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.20	Available at various times?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.21	Available without having to request them?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.22	Are female condoms available in female prisons?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.23	Do prisoners have access to sterile tattooing equipment?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.24	Is naloxone (used to reverse opioid overdoses) available in the prison?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

<sup>18</sup> See the glossary for a definition of 'gender-responsive'.

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

3. EVIDENCE-BASED DRUG DEPENDENCE TREATMENT AND CARE		Details / Comments
<i>(to be asked to prisoners and health care staff)</i>		
3.1	Do prisoners have access to opioid substitution therapy during detention? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.2	If so, is this substitution therapy:	
3.3	Accessible on a voluntary basis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.4	Available without interruption to prisoners who were receiving it prior to incarceration? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.5	If so, are they receiving the same dosage? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.6	Available to prisoners who were not receiving it before incarceration? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.7	The same quality as that available in the broader community? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.8	Equally accessible to women? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.9	Accessible on a confidential basis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.10	Free of charge? If not, how much does it cost? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.11	Available on an uninterrupted basis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.12	Available for prisoners on their release? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.13	Accompanied by relevant information? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.14	Provided in conjunction with other services and support, including counseling and psychosocial services? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.15	Gender-responsive? <input type="checkbox"/> Yes <input type="checkbox"/> No	
What medication is available for opioid substitution therapy? Please select answer(s):		
3.16	<input type="checkbox"/> Methadone <input type="checkbox"/> Buprenorphine <input type="checkbox"/> Diamorphine <input type="checkbox"/> Slow-release oral morphine Others:	
3.17	Are detoxification programmes available to prisoners? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.18	If so, are these:	
3.19	Accessible on a voluntary basis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.20	Available on a confidential basis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.21	Available in a timely fashion? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.22	Available on admission? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.23	Available at any point during a prisoner's sentence? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.24	Supervised by a trained medical professional? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.25	Undertaken with medication? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.26	Free of charge? If not, how much do they cost? <input type="checkbox"/> Yes <input type="checkbox"/> No	

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

3. EVIDENCE-BASED DRUG DEPENDENCE TREATMENT AND CARE			Details / Comments
<i>(to be asked to prisoners and health care staff)</i>			
3.27	Provided in conjunction with other services and support, including counselling and psychosocial services?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.28	Gender-responsive?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.29	Is there a functioning system of referral and cooperation between medical services inside and outside prisons to ensure continuity of evidence-based drug dependence treatment between correctional institutions and jurisdictions, and following release?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.30	Do prison health services provide or facilitate specialised drug treatment programmes designed especially for: Women: Transgender people:	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.31	Are drug free units <sup>19</sup> available to prisoners on a voluntary basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

4. HIV TREATMENT AND CARE			Details / Comments
<i>(to be asked to health care staff and prisoners. Also based on independent inspection and observation.)</i>			
4.1	Do prisoners living with HIV receive, at each stage of their illness, appropriate medical and psychosocial treatment at least equivalent to that available to the broader community?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.2	Is antiretroviral therapy (ART) available to all prisoners living with HIV?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.3	Is the ART available to prisoners the same as that available in the broader community?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.4	Do all prisoners living with HIV have access to adequate pain management medications?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.5	Is all HIV treatment gender-responsive?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.6	Is the diagnosis and treatment of sexually transmitted infections, TB, hepatitis and other opportunistic infections provided as a key component of comprehensive HIV care?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.7	Is post-exposure prophylaxis (PEP) <sup>20</sup> offered to all prisoners and staff subject to exposure that has the potential for HIV transmission?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.8	If so, is it available on a confidential basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.9	If so, is it initiated within 72 hours of exposure?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
4.10	In the last year, how many times has PEP been administered to: Prisoners:                      Staff members:		

<sup>19</sup> Units or wings in places of detention that allow prisoners to keep a distance from the prison drug culture and provide drug-free spaces for those seeking it. Prisoners stay in these units voluntarily.

<sup>20</sup> Post-exposure prophylaxis is short-term antiretroviral treatment used to reduce the likelihood of HIV infection after potential exposure.

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

4. HIV TREATMENT AND CARE		Details / Comments
<i>(to be asked to health care staff and prisoners. Also based on independent inspection and observation.)</i>		
4.11	To prevent mother-to-child transmission, do pregnant prisoners have access antiretroviral prophylaxis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.12	Is a written record of all medications given, response to treatment, and adverse reactions kept for prisoners living with HIV? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.13	How is the quality of medication necessary for HIV treatment guaranteed?	
4.14	Are prisoners undergoing HIV treatment offered support services, including counselling? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.15	Do prisoners living with HIV have access to palliative care that meets standards available in the wider community? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.16	Are options available for the early release of prisoners for advanced stages of HIV-related illness? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.17	Are all costs associated with HIV treatment covered by the state and/or the prison authorities? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.18	Is there a functioning system of referral and cooperation between medical services inside and outside the prison to ensure continuity of HIV treatment and care between correctional institutions and jurisdictions, and following release? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.19	Do prisoners living with HIV ever have difficulty accessing available treatment and care because of stigma or discrimination? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.20	On a scale of 1 to 10, how would you rate the quality of HIV treatment and care? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

5. HCV TREATMENT AND CARE		Details / Comments
<i>(to be asked to prisoners and health care staff and prisoners, as appropriate. Also based on independent inspection and observation.)</i>		
5.1	Are prisoners living with HCV clinically evaluated for the presence or severity of liver damage and the need for treatment? <input type="checkbox"/> Yes <input type="checkbox"/> No	
5.2	Which of the following methods is/are used for this evaluation?? <u>Please select answer(s):</u> <input type="checkbox"/> Liver biopsy <input type="checkbox"/> Fibroscan <input type="checkbox"/> Biological test <input type="checkbox"/> Non-invasive tests Others:	
5.3	Do prisoners living with HCV receive the most up-to-date and evidence-based treatment and therapies? <input type="checkbox"/> Yes <input type="checkbox"/> No	
5.4	Is HCV treatment gender-responsive? <input type="checkbox"/> Yes <input type="checkbox"/> No	
5.5	Are prisoners undergoing HCV treatment closely monitored by health care staff for adverse reactions and to determine disease progression? <input type="checkbox"/> Yes <input type="checkbox"/> No	

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

## 5. HCV TREATMENT AND CARE

*(to be asked to prisoners and health care staff and prisoners, as appropriate. Also based on independent inspection and observation.)*

Details / Comments

5.6	Are any costs associated with HCV treatment covered by the state and/or the prison authorities?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
5.7	How is the quality of HCV medication guaranteed?		
5.8	Is there a functioning system of referral and cooperation between medical services inside and outside the prison to ensure continuity of HCV care and treatment between correctional institutions and jurisdictions, and following release?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
5.9	On a scale of 1 to 10, how would you rate the quality of HCV treatment and care? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10		

## 6. TB TREATMENT AND CARE

*(to be asked to health care staff and prisoners, as appropriate. Also based on independent observation and inspection.)*

Details / Comments

6.1	Is TB treatment initiated immediately upon detection?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.2	If not, how long do prisoners generally have to wait for TB treatment?		
6.3	Are all prisoners living with TB transferred to a TB treatment facility?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.4	Are prisoners living with infectious TB isolated in properly ventilated facilities while contagious?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.5	Do all prisoners living with TB who have not previously been treated for the disease receive a first-line treatment regimen? <sup>21</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.6	Is drug susceptibility testing (DST) <sup>22</sup> performed at the start of therapy for all previously treated prisoners living with TB?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.7	Are prisoners with multiple drug-resistant (MDR)-TB treated with specialised regimens containing second-line anti-tuberculosis medicines?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.8	Is all TB treatment gender-responsive?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.9	Do prisoners living with TB have access to an uninterrupted supply of medicine?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
6.10	How is the quality of TB medication guaranteed?		
6.11	Is TB treatment administered under the direct supervision of qualified health care staff?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

<sup>21</sup> This refers to the essential anti-TB drugs and their recommended dosage. See the WHO Model List of Essential Medicines for more information.

<sup>22</sup> Testing to find out which drugs the TB bacteria in a person are sensitive to, and therefore whether the person has drug-resistant TB.

# Monitoring HIV, HCV, TB and Harm Reduction in Prisons

6. TB TREATMENT AND CARE		Details / Comments
<i>(to be asked to health care staff and prisoners, as appropriate. Also based on independent observation and inspection.)</i>		
6.12	Are all prisoners living with TB monitored for response to treatment at least at the time of completion of the initial phase of treatment (two months), at five months, and at the end of treatment?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.13	Is the adherence to the treatment regimen of prisoners living with TB assessed by qualified health care staff?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.14	Are prisoners undergoing TB treatment offered support services, including counselling?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.15	Is voluntary HIV counselling and testing part of the routine management of all prisoners living with TB?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.16	Is a written record of all medications given, response to treatment, and adverse reactions kept for prisoners living with TB?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.17	Are all costs associated with TB treatment and care covered by the state and/or prison authorities?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.18	Is there a functioning system of referral and cooperation between medical services inside and outside the prison to ensure continuity of TB treatment and care between correctional institutions and jurisdictions, and following release?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6.19	On a scale of 1 to 10, how would you rate the quality of TB treatment and care?	
	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

## Appendix A

# THE NATIONAL CONTEXT

Understanding and analysing the broader national context is an important element of preventing ill treatment in places of detention because it can help to reveal some of the risk factors, or conditions, that increase the likelihood of ill treatment occurring. For example, if drug users are stigmatised and criminalised, and if there are no harm reduction policies or strategies in place because of a lack of political will, this will not only translate into higher numbers of people who use drugs and are living with HIV and HCV behind bars, but it will also increase their risk of ill treatment. Or if there are an inadequate amount of resources being allocated for prison health, this will affect the availability and quality of health services within prisons. In short, the existence of an enabling environment will inevitably facilitate the promotion and protection of prisoners' human rights.

## Appendix A - The National Context

1. LEGAL ENVIRONMENT		Details / Comments
<i>(to be asked to government authorities, or answered through independent research)</i>		
1.1	Has the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment been ratified?	<input type="checkbox"/> Yes <input type="checkbox"/> No
1.2	Has the Optional Protocol to the Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment been ratified?	<input type="checkbox"/> Yes <input type="checkbox"/> No
1.3	Have these conventions been integrated into national law?	<input type="checkbox"/> Yes <input type="checkbox"/> No
1.4	Is drug use or possession for personal use a criminal offence in the country?	<input type="checkbox"/> Yes <input type="checkbox"/> No
1.5	Is there data on the percentage of the prison population incarcerated for drug charges? If yes, what is the figure?	<input type="checkbox"/> Yes <input type="checkbox"/> No

2. POLICY ENVIRONMENT		Details / Comments
<i>(to be asked to government prison authorities, and/or answered through independent research)</i>		
2.1	Which department of government is responsible for health in prisons?	
2.2	Are there national policies or guidelines on HIV, HCV and TB?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.3	If so, are these also applicable to prisons?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.4	Are there national policies or guidelines on harm reduction and drug-related treatment?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.5	If so, are these also applicable to prisons?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.6	Have specific policies or guidelines for the prevention, care and treatment of HIV, HCV and TB been devised for prisons?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.7	Have specific policies or guidelines on harm reduction and drug-related treatment been devised for prisons?	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.8	Are prison health policies and guidelines, especially those relating to HIV, HCV, TB and harm reduction, based on the assessed needs of the specific prison population? <sup>23</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.9	Are the specific needs of female prisoners integrated into the development and implementation of prison health policies, guidelines and strategies? <sup>24</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No
2.10	Are the specific needs of other vulnerable groups, including people who inject drugs, sex workers and transgender people, taken into account in prison health policies, guidelines and strategies?	<input type="checkbox"/> Yes <input type="checkbox"/> No

<sup>23</sup> For example, do they refer to the findings of authoritative studies assessing the specific needs of the prison population?

<sup>24</sup> Specific needs of female prisoners include, but are not limited to: particular hygiene requirements, including sanitary articles and safe and regular access to hot water; different and greater primary health care needs partly due to their typical backgrounds, which can include drug use, physical and sexual abuse, sex work; a greater need for psychological care, counseling and support because of abusive backgrounds; and specific reproductive health care and family planning advice. For more information see: UN 'Rules for the Treatment of Women Prisoners and Non-Custodial Measures for Women Offenders (the Bangkok Rules)' available at: <http://www.un.org/en/ecosoc/docs/2010/res%202010-16.pdf> (date of last access 17 December 2015).

## Appendix A - The National Context

2. POLICY ENVIRONMENT		Details / Comments
<i>(to be asked to government prison authorities, and/or answered through independent research)</i>		
2.11	Do policies, guidelines and strategies on prison health explicitly protect against stigma and discrimination on the grounds of legal status, health status, race, gender, sexual orientation, and drug use? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.12	Do prison staff or other representatives of the prison sector participate in the development of policies, guidelines and strategies relating to prison health? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.13	Do former and/or current prisoners participate in the development of policies, guidelines and strategies relating to their health? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.14	On a scale of 1 to 10, how active and informed is prisoner participation <sup>25</sup> in the development of policies, guidelines and strategies relating to their health? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

3. RESOURCES		Details / Comments
<i>(to be asked to government authorities, prison authorities and/or answered through independent research)</i>		
3.1	What is the amount of funding for health care per prisoner per year?	
3.2	On a scale of 1 to 10, how sufficient would you rate the <i>financial</i> resources available within the prison health system to meet the challenges of HIV, HCV and TB? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	
3.3	On a scale of 1 to 10, how sufficient would you rate the <i>human</i> resources available within the prison health system to meet the challenges of HIV, HCV and TB? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

4. INTEGRATION <sup>26</sup> AND EQUIVALENCE <sup>27</sup>		Details / Comments
<i>(to be asked to government authorities, prison authorities and/or answered through independent research)</i>		
4.1	Is prison health policy integrated into, and compatible with, national health policy? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.2	Are public health services collaborating with prison health systems and staff? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.3	Are prison health care staff integrated into the public health service? For example, do they have access to the same training? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.4	Are needle and syringe programmes available in the broader community? <input type="checkbox"/> Yes <input type="checkbox"/> No	

<sup>25</sup> Please see definition of 'active and informed participation' in the glossary.

<sup>26</sup> Often prisons are considered as separate entities from the rest of society. In order to protect prisoners' health and rights, however, prison health services need to be integrated into public health services. This ensures accessibility, availability, acceptability and quality of goods, services, and facilities. These questions, therefore, are meant to evaluate the degree of integration.

<sup>27</sup> It is widely accepted that people in prison have a right to a standard of health care equivalent to that available outside of prisons. This is known as the 'principle of equivalence'. Strong arguments have been put forth, however, that States actually have a responsibility to provide a higher standard of health in prisons than is generally available to people outside of prisons to address the unique health needs and circumstances of people in prison, and to meet public health objectives. See: Lines R 'From equivalence of standards to equivalence of objectives: The entitlement of prisoners to health care standards higher than those outside prisons' (December 2006) International Journal of Prisoner Health vol 2 no 4:269-280.

## Appendix A - The National Context

4. INTEGRATION <sup>26</sup> AND EQUIVALENCE <sup>27</sup>		Details / Comments
<i>(to be asked to government authorities, prison authorities and/or answered through independent research)</i>		
4.5	Is opioid substitution therapy (OST) available in the broader community? <input type="checkbox"/> Yes <input type="checkbox"/> No	
4.6	If so, what medication is available for OST in the broader community? <u>Please select answer(s):</u> <input type="checkbox"/> Methadone <input type="checkbox"/> Buprenorphine <input type="checkbox"/> Diamorphine <input type="checkbox"/> Slow-release oral morphine Others:	

## Appendix B

# THE PRISON HEALTH SYSTEM

This complementary questionnaire is comprised of questions relating to the broader prison health system, including conditions of detention, information and education, medication, prison staff, etc. Of course, the issues touched upon in the other questionnaires are also part of the prison health system and are important in monitoring and evaluating its strength and effectiveness. However, these have been separated for ease of use and accessibility. While some of the following questions might already form part of your monitoring practice, they are nevertheless important to include here for those who might wish to undertake targeted visits, or who may not be familiar with the issues, how they all interrelate, and how they might help identify situations, practices or conditions that could lead to ill treatment.

## Appendix B - The Prison Health System

1. PRISON CONDITIONS		Details / Comments
<i>(to be asked to prisoners, prison authorities and/or health care staff as appropriate. Also based on independent inspection and observation.)</i>		
1.1	What is the total capacity of the prison?	
1.2	What is the total number of prisoners currently being held in the prison?	
1.3	Are prisoners held in dormitories or cells or both?	
1.4	How much space do prisoners have in their cells/dormitories in metres squared?	
1.5	Does each prisoner have an individual mattress and bedframe in the cell/dormitory? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.6	Are prisoners provided with food that is:	
1.7	Nutritious? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.8	Appropriate for their health status? i.e. are special diets available, if necessary, for those undergoing treatment? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.9	Is safe and clean drinking water available to all prisoners, whenever they need it? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.10	On a scale of 1 to 10, how would you rate prisoner access to natural light in the places where they are required to live and work? <i>(If the answers are different living and work place, please explain in the details/comment column).</i> <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	
1.11	On a scale of 1 to 10, how would you rate prisoner access to fresh air (ventilation) in the places where they are required to live and work? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	
1.12	On a scale of 1 to 10, how well are temperatures regulated to suit the climate or the season in the places where prisoners live and work? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	
1.13	Do prisoners have access to toilets that allow them to relieve themselves in a clean and private manner? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.14	Can prisoners access a toilet whenever they need one? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.15	If not, how long have some prisoners had to wait to access a toilet?	
1.16	Do prisoners have access to bathing and shower installations that allow them to bathe at a temperature suitable to the climate? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.17	How often and for how long are prisoners able to use bathing and shower installations?	
1.18	In order to maintain adequate standards of personal hygiene, are prisoners provided with the following items free of charge and as needed:	
1.19	Soap? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.20	A toothbrush and toothpaste? <input type="checkbox"/> Yes <input type="checkbox"/> No	

## Appendix B - The Prison Health System

1. PRISON CONDITIONS			Details / Comments
<i>(to be asked to prisoners, prison authorities and/or health care staff as appropriate. Also based on independent inspection and observation.)</i>			
1.21	Sanitary towels and/or tampons?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
1.22	Razor?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
1.23	On a scale of 1 to 10, how would you rate prisoners' clothing and bedding in terms of cleanliness and condition? <sup>28</sup> <i>(If the answers are different for bedding and clothing, please explain in the details/comment column).</i>	<input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	
1.24	Do prisoners have equal access to regular outdoor exercise? <sup>29</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No	

2. MEDICAL SCREENING			Details / Comments
<i>(to be asked to health care staff)</i>			
2.1	Are all prisoners seen by a qualified health care staff member to assess their health and medical needs within 24 hours of arrival?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.2	Does this entry examination include:		
2.3	Testing for HIV?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.4	Testing for Hepatitis B and C?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.5	Screening for TB	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.6	Screening for potential withdrawal symptoms resulting from the use of drugs, medication or alcohol?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.7	Are all entry examinations accompanied by accessible information on HIV, HCV and TB prevention?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.8	Are HIV tests:	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.9	Voluntary?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.10	Carried out with the informed consent of prisoners?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.11	Free of charge?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.12	Confidential?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.13	Available at any time during detention?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.14	Equally accessible to all prisoners?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.15	If not, which prisoners do not have equal access?		
2.16	Accompanied by relevant and accessible information?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.17	Accompanied by confidential pre- and post-test counseling?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

<sup>28</sup> Bedding and clothing should be changed and washed regularly for these to be considered clean and in good condition.

<sup>29</sup> According to rule 23(1) of the updated UN Standard Minimum Rules for the Treatment of Prisoners, every prisoner should have at least one hour of suitable exercise in the open air daily if the weather permits.

## Appendix B - The Prison Health System

2. MEDICAL SCREENING			Details / Comments
<i>(to be asked to health care staff)</i>			
2.18	The same quality as those available in the community?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.19	When TB is detected, are infectious cases separated from the general prison population? <sup>30</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.20	If drug withdrawal symptoms are detected, is a suitable stabilisation, maintenance, or detoxification programme determined with the prisoner's participation?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
2.21	Are all medical examinations conducted out of the hearing of third parties?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

  

3. INFORMATION AND EDUCATION			Details / Comments
<i>(to be asked to prisoners and/or custodial and health care staff. Also based on independent inspection and observation.)</i>			
3.1	Is an educational initiative about health promotion, including healthy lifestyles (i.e. nutrition, exercise, safe sexual behaviour and practices, etc.), being implemented in the prison?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.2	Do prisoners participate in the development of health education programmes and materials?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.3	If so, on a scale of 1 to 10, how active and informed is this participation? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10		
3.4	Briefly describe the types of health education methods/materials being used:		
3.5	Is information about HIV, HCV and TB, including methods of transmission and means of prevention, disseminated to all prisoners and prison staff on a regular basis?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.6	If so, is this information:		
3.7	Accurate?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.8	Non-judgmental?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.9	Relevant to the prison environment?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.10	Translated into several languages?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.11	Is the content of educational materials on HIV, HCV and TB respectful of, and relevant to, differences in:		
3.12	Gender? <sup>31</sup>	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.13	Sex?	<input type="checkbox"/> Yes <input type="checkbox"/> No	

30 The isolation of a patient with a transmissible disease is only justified if such a measure is medically necessary and would also be taken outside the prison environment for the same medical reasons. There is no medical justification for the segregation of prisoners solely on the grounds that they are living with HIV.

31 For example, women prisoners benefit from interventions that address HIV and HCV prevention in terms of interactions and relationships with other people and those that also address the cultural and socioeconomic conditions in which women live. Engagement of transgender prisoners in HIV prevention, care and treatment is enhanced by interventions that are gender affirming and integrate transition-related health care needs. See: Sevelius J 'Transgender Issues in HIV (December 2013) HIV Specialist, available at: [http://www.transhealth.ucsf.edu/pdf/Sevelius\\_HIV\\_Specialist\\_Dec13.pdf](http://www.transhealth.ucsf.edu/pdf/Sevelius_HIV_Specialist_Dec13.pdf) (date of last access 17 December 2015).

## Appendix B - The Prison Health System

3. INFORMATION AND EDUCATION			Details / Comments
<i>(to be asked to prisoners and/or custodial and health care staff. Also based on independent inspection and observation.)</i>			
3.14	Health status?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.15	Literacy/education level?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.16	Age?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.17	Race?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.18	Ethnicity?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.19	Culture?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.20	Religion?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.21	Language?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.22	Sexual orientation?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.23	Does the content of educational materials and programmes on HIV, HCV and TB combat:		
3.24	HIV-related discrimination and stigma?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.25	Homophobia and the stigma associated with same-sex sexual relationships?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.26	Discrimination and stigma associated with gender identity and/or expression?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.27	Discrimination associated with sex work and drug use?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.28	Is information being provided to drug users to promote harm reduction and to facilitate their access to appropriate services?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.29	On a scale of 1 to 10, how would you rate prisoner and staff opportunities to discuss health information with qualified health professionals? <i>(if different for prisoners and staff, please explain in the comments/details column).</i> <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10		
3.30	Are prisoners given information about prison health services, in a format/ language they can understand, explaining how to access them?	<input type="checkbox"/> Yes <input type="checkbox"/> No	
3.31	If so, who is involved in disseminating this information? <u>Please select answer(s):</u> <input type="checkbox"/> Prisoners <input type="checkbox"/> Custodial Staff <input type="checkbox"/> Health care staff <input type="checkbox"/> Outside agencies Other(s):		

## Appendix B - The Prison Health System

4. INFORMED CONSENT		Details / Comments
<i>(to be asked to prisoners and/or health care staff, as appropriate)</i>		
4.1	Are prisoners informed of the clinical and prevention benefits of testing for HIV, HCV and TB?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.2	Are all staff members informed of the clinical and prevention benefits of testing for HIV, HCV and TB?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.3	Are prisoners living with HIV, HCV and/or TB provided with relevant and accessible information concerning their disease, the course of the treatment and any medication(s) prescribed to them?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.4	Are prisoners informed of the follow-up services available to them?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.5	Are prisoners free to refuse treatment or any other medical intervention?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.6	Are prisoners informed of their right to refuse before any medical intervention?	<input type="checkbox"/> Yes <input type="checkbox"/> No
4.7	Can prisoners who refuse medical interventions be subjected to disciplinary measures, i.e. segregation?	<input type="checkbox"/> Yes <input type="checkbox"/> No

5. MEDICAL RECORDS		Details / Comments
<i>(To be asked to health care staff)</i>		
5.1	Are standardised forms designed for recording the medical examinations of prisoners?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.2	Do these forms include:	
5.3	The prisoner's name, age and cell number?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.4	The doctor's name?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.5	The date, time and focus of all examinations?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.6	A record of the prisoner's infectious disease history, including TB, HIV and/or HCV status?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.7	A record of the prisoner's vaccination history?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.8	Diagnostic information?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.9	Any specific examinations undergone?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.10	Are these medical files securely held to protect the prisoner's right to confidentiality?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.11	Do only medical personnel have access to prisoner medical files?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.12	Can prisoners access their medical files upon request?	<input type="checkbox"/> Yes <input type="checkbox"/> No
5.13	Can prisoners obtain a copy of their medical files upon request?	<input type="checkbox"/> Yes <input type="checkbox"/> No

## Appendix B - The Prison Health System

5. MEDICAL RECORDS		Details / Comments
<i>(To be asked to health care staff)</i>		
5.14	In the event of a transfer, is the prisoner's medical information forwarded to the doctors in the receiving establishment? <input type="checkbox"/> Yes <input type="checkbox"/> No	
5.15	Upon release, is the prisoner's medical information forwarded to a community doctor of their choice? <input type="checkbox"/> Yes <input type="checkbox"/> No	
5.16	Are strategies in place to ensure secure information sharing between service providers in the community and in prisons? <input type="checkbox"/> Yes <input type="checkbox"/> No	

6. MEDICATION		Details / Comments
<i>(to be asked to health care staff, prisoners, and/or medicine monitoring bodies)</i>		
6.1	Do prisoners receive a regular, uninterrupted supply of the essential medicines required for their treatment? <input type="checkbox"/> Yes <input type="checkbox"/> No	
6.2	Is all medicine dispensed by a qualified health care staff member? <input type="checkbox"/> Yes <input type="checkbox"/> No	
6.3	Are guidelines in place to ensure all medicines are of adequate quality? <input type="checkbox"/> Yes <input type="checkbox"/> No	
6.4	Is medication stored in appropriate locations and temperatures? <input type="checkbox"/> Yes <input type="checkbox"/> No	
6.5	Are qualified health care staff members available to ensure that prisoners take prescribed medicines in the right doses and at the right intervals? <input type="checkbox"/> Yes <input type="checkbox"/> No	

7. GENERAL TREATMENT AND CARE		Details / Comments
<i>(to be asked to prisoners and health care staff. Some answers based on independent observation and inspection.)</i>		
7.1	In your opinion, do prisoners receive the same quality of care, treatment and support as persons living in the community? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.2	Do all prisoners have access to a member of the health care staff at any time, irrespective of their detention? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.3	How do prisoners communicate a request to consult a health care staff member?	
7.4	Are prisoners' requests to consult a health care staff member met without undue delay? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.5	If a prisoner requests to be examined or treated by a health care staff member of the same sex or gender, is one made available? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.6	Are prisoners in need of diagnostic examination and/or hospital treatment promptly transferred to appropriate medical facilities? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.7	Are prisoners involved in planning their own care and treatment? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.8	Do women receive the same quality of care and treatment as men? <input type="checkbox"/> Yes <input type="checkbox"/> No	

## Appendix B - The Prison Health System

7. GENERAL TREATMENT AND CARE		Details / Comments
<i>(to be asked to prisoners and health care staff. Some answers based on independent observation and inspection.)</i>		
7.9	Are gender-responsive healthcare services, at least equivalent to those available in the wider community, available to all prisoners? <input type="checkbox"/> Yes <input type="checkbox"/> No	
7.10	One a scale of 1 to 10, how would you rate the quality of the prison's health facilities? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	
7.11	One a scale of 1 to 10, how would you rate the quality of the prison's health services? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

8. PRISON STAFF (HEALTH CARE AND CUSTODIAL)		Details / Comments
<i>(to be asked to prison authorities and staff. Some answers based on independent observation and inspection.)</i>		
8.1	Do prison staff receive information on infectious disease prevention during their initial training? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.2	Do prison staff receive refresher information and training on infectious disease prevention on a regular basis? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.3	Do prison staff receive general human rights training? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.4	Do prison staff receive training on prisoners' health rights? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.5	Do prison staff receive training on the prevention of torture and ill treatment of prisoners? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.6	Do prison staff receive gender-responsive training? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.7	How many of each of the following staff members work in the prison? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.8	F/T <sup>32</sup> general practitioners: P/T <sup>33</sup> general practitioners:	
8.9	F/T nurses: P/T nurses:	
8.10	F/T HIV specialists: P/T HIV specialists:	
8.11	F/T hepatologists: <sup>34</sup> P/T hepatologists:	
8.12	F/T TB specialists: P/T TB specialists:	
8.13	F/T gastroenterologists: <sup>35</sup> P/T gastroenterologists:	
8.14	F/T drug dependence specialists: P/T drug dependence specialists:	
8.15	F/T psychologists: P/T psychologists:	
8.16	F/T psychiatrists: P/T psychiatrists:	
8.17	F/T gynaecologists: P/T gynaecologists:	

32 F/T refers to full-time employees working in the prison.

33 P/T refers to part-time, on-call or contract employees working in the prison.

34 Doctors who specialise in liver diseases.

35 Doctors who specialise in stomach and intestinal diseases.

## Appendix B - The Prison Health System

8. PRISON STAFF (HEALTH CARE AND CUSTODIAL)		Details / Comments
<i>(to be asked to prison authorities and staff. Some answers based on independent observation and inspection.)</i>		
8.18	Are any health care staff positions currently vacant? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.19	If yes, which positions are currently vacant, and how long have they been vacant for?	
8.20	Are there any obstacles to filling vacant positions (i.e. policy or budgetary reasons)? <input type="checkbox"/> Yes <input type="checkbox"/> No  Is yes, please list these:	
8.21	For women's prisons: What percentage of the staff are women?	
8.22	Do all health care staff members have appropriate qualifications and credentials? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.23	Are health care staff qualifications and credentials checked regularly? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.24	Are health care staff independent from the prison system? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.25	Are the working hours of health care staff appropriate to the needs of the prison? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.26	Are members of health care staff on duty day and night, and on weekends? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.27	Are all staff receiving domestically competitive salaries and benefits? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.28	Do the staff terms and conditions permit a healthy work-life balance? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.29	Are adequate measures in place to ensure staff safety? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.30	Are courses on harm reduction available to prison health care staff? <input type="checkbox"/> Yes <input type="checkbox"/> No	
8.31	On a scale of 1 to 10, how would you rate the quality of the health care staff? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

## Appendix C

# ACCOUNTABILITY

The following questionnaire looks at issues relating to accountability in the context of HIV, HCV, TB and harm reduction in prisons. As the questionnaire demonstrates, accountability is made up of three main components: monitoring, review and remedies.<sup>36</sup> Not only are these legally binding human rights obligations and key elements of a human rights-based approach, but the level and effectiveness of accountability mechanisms in prisons can also either increase or reduce the risk of ill treatment of prisoners.

---

<sup>36</sup> Hunt, P(2013) 'Introduction' *Maternal Mortality: Human Rights and Accountability*, Paul Hunt and Tony Gray (eds). London: Routledge.

## Appendix C - Accountability

1. MONITORING		Details / Comments
<i>(to be asked to prison authorities, health care staff and prisoners)</i>		
1.1	Is there a qualified body in place to oversee, supervise and inspect the health administration of the prison? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.2	If so, what or who is this body and how often does it inspect the health administration of the prison?	
1.3	Is there a routine health data collection system in place? <sup>37</sup> <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.4	If so, please briefly describe it:	
1.5	What type of health data does it collect?	
1.6	Does it incorporate HIV, HCV and TB? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.7	Are data disaggregated? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.8	If so, on what grounds:	
1.9	Are data on HIV, HCV and TB and related deaths reported to the central prison administration? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.10	Are the implementation of specific policies and programmes relating to HIV, HCV and TB accompanied by measures to monitor progress and evaluate effectiveness? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.11	Are measures taken to ensure that human rights violations do not occur in the process of evaluation or data collection (i.e. violation of confidentiality and consent)? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.12	If yes, please briefly describe these measures:	
1.13	Are indicators on prison health disaggregated on some or all of the prohibited grounds of discrimination? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.14	Is the situation of vulnerable groups with respect to HIV, HCV and TB, including sex workers and injecting drug users, appropriately addressed without intensifying discrimination? <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.15	Do prisoners participate in the monitoring and assessment of health interventions? <sup>38</sup> <input type="checkbox"/> Yes <input type="checkbox"/> No	
1.16	On a scale of 1 to 10, how active and informed is prisoner participation in this regard? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

<sup>37</sup> These range from systematic, standardised and computerised approaches, to regular, repeated surveys, to occasional epidemiological studies covering specific topics, such as HIV.

<sup>38</sup> Prisoners should be part of the process of determining the success or failure of interventions that affect their health. In practice, this means that they should also be involved in developing the indicators and benchmarks necessary for monitoring and evaluating interventions.

## Appendix C - Accountability

2. REVIEW		Details / Comments
<i>(to be asked to prisoners and prison authorities. Some answers based on independent observation and inspection.)</i>		
2.1	Are there avenues for prisoners to make comments/complaints about their prison conditions, as well as their health care & treatment? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.2	If so, are these:	
2.3	Easily accessible? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.4	Confidential? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.5	Uncensored? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.6	If complaints boxes are used, are these locked and regularly emptied? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.7	How many complaints were made in the last year?	
2.8	Number of health-related complaints:	
2.9	Number of HIV-related complaints:	
2.10	Number of HCV-related complaints:	
2.11	Number of TB-related complaints:	
2.12	Number of complaints related to harm reduction services or drug dependence treatment:	
2.13	Are there systems in place to support prisoners who may need assistance in making comments/complaints? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.14	Are prisoners able to make complaints to an authority independent of the prison system? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.15	Are all prisoners provided with information about accessing complaint mechanisms? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.16	If so, is this information in a language/format they understand? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.17	Is the complaints system adapted to the needs and situation of the prisoner? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.18	Are responses to health-related complaints:	
2.19	Timely? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.20	Easy to understand? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.21	Kept confidential? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.22	Dealt with by custodial staff? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.23	Dealt with by health care staff? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.24	Directly related to the substance of the complaint? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.25	How are prisoners who make complaints protected from discrimination?	

## Appendix C - Accountability

2. REVIEW		Details / Comments
<i>(to be asked to prisoners and prison authorities. Some answers based on independent observation and inspection.)</i>		
2.26	How are prisoners who make complaints protected from reprisals?	
2.27	Are complaints analysed to identify key trends or patterns? <input type="checkbox"/> Yes <input type="checkbox"/> No	
2.28	On a scale of 1 to 10, how would you rate the prison's complaints mechanisms? <input type="checkbox"/> 1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 6 <input type="checkbox"/> 7 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10	

3. REMEDIES		Details / Comments
<i>(to be asked to prison authorities)</i>		
3.1	Are any mechanisms and institutions empowered to provide remedies to prisoners for human rights violations? <input type="checkbox"/> Yes <input type="checkbox"/> No	
3.2	If so, please list them:	
3.3	What types of remedies are available to prisoners?	
3.4	How many prisoners have been granted a remedy for a violation of their right to health?	
3.5	How many prisoners have been granted a remedy for a violation of their right to humane treatment relating to HIV, HCV and TB?	

Prisons are particularly high-risk environments for the transmission of HIV, hepatitis C (HCV) and TB. There are several reasons for this, including the fact that harm reduction services remain extremely limited in prisons in comparison to what is available in the broader community. These issues have serious public health and human rights implications. Increasingly, UN mechanisms and human rights courts are finding that they can contribute to, or even constitute, conditions that meet the threshold of ill treatment. For this reason, it is very important for prison monitoring mechanisms, particularly those that are mandated to prevent ill treatment, to consider issues relating to HIV, HCV, TB and harm reduction in a comprehensive and systematic manner during their visits.

This monitoring tool has been developed to assist these mechanisms and other prison monitors to generate better informed, more consistent and sustained monitoring of issues relating to HIV, HCV, TB and harm reduction in prisons, and ultimately to prevent situations and conditions that can lead to ill treatment in this context from occurring in the first place.

**Harm Reduction International** is an international non-governmental organisation that works to reduce drug-related harms by promoting evidence-based public health policy and practices, and human rights based approaches to drug policy through an integrated programme of research, analysis, advocacy and civil society strengthening. Our vision is a world in which individuals and communities benefit from drug laws, policies and practices that promote health, dignity and human rights.
